Let's face it! Despite scouting plenty of Math geniuses every year, **#MathInIndia** is feared by many. And the fright begins not in senior school but at a much nascent stage of class III. Only 25.3% of the kids are able to subtract 10 from 25, according to numbers revealed by Annual Status of Education Report (ASER) 2014 this January! Shameful, right?

To bring this serious problem to our attention and highlight our fear of Math, **Akshara Foundation**, an NGO catering to child education in India, has modified some epic Bollywood dialogues. Hopefully, this will reduce our fear!
